

1 INTRODUCTION

1.1 Background

A survey about the British general election of February 1974 was conducted with a panel of respondents who had previously been interviewed twice, in 1969 and after the general election of 1970. The survey was sponsored by the British Election Study at the University of Essex, a team continuing SSRC grant aided research started by David Butler and Donald Stokes at Nuffield College, Oxford in 1963. Social and Community Planning Research was invited to conduct the fieldwork stage of the study all other stages were undertaken by the researchers in the British Election Study team. This report describes the technical side of the fieldwork for which SCPR was responsible, and comments on aspects of the questionnaire that were new to the field personnel who did the interviewing.

The first study by Butler and Stokes was designed to add to the small amount of information about British voting behaviour that existed, using the panel design that had been successfully tried out in the United States in studies of electoral behaviour. Butler and Stokes completed the first study in 1966 after three waves of interviewing, in 1963, after the 1964 general election, and after the 1966 General election. Their book *"Political Change in Britain: forces shaping electoral choice"* was published in 1969, in it the sample design and the methodology are discussed. Butler and Stokes then began a second study with a similar design. The first interviews with a sample of electors in 80 constituencies throughout Great Britain were completed in 1969. After the June 1970 general election a second wave of interviews was conducted with the same sample. In February 1974 the responsibility for the conduct and administration of a third wave of interviews with the panel was transferred to the University of Essex. The University conducted a complementary survey of electors throughout Great Britain at the same time: these electors were to become a new panel to be re-interviewed at the time of the next general election.

In the following pages the survey will be described under these headings.

| Section 3 | The fieldwork stage |
| Section 4 | Miscellaneous comments |

These will be followed by detailed appendices.

2 PRELIMINARY STAGES OF THE STUDY

2.1 The sample

Originally 80 constituencies had been selected with probability proportionate to size of electorate from a list of 613 constituencies throughout Great Britain (excluding Northern Ireland and constituencies north of the Caledonian canal). The list was stratified by region and by whether the constituencies were in urban areas or in rural areas. Electors names and addresses were drawn from the 1969-70 electoral registers of each of the selected constituencies.

The sample for this 1974 survey included the names and addresses of those who were interviewed in 1970, of whom about half had also been interviewed in 1969. It excluded those who had been interviewed in 1969 and who had moved out of the constituency between then and the 1970 wave of interviews. Addresses that appeared vague or incomplete were also included in the sample. Initially the intention was to follow up and interview only named respondents at their original address. Over the three and a half years since the previous wave of interviews we expected about 35% of the sample to have moved away or died, and expected to contact only about 1200 people. In fact we found 1,246 'in scope' individuals.

Subsequently we were asked to contact and interview respondents who had moved 'locally', to a political environment similar to the one in which they were living in 1970. In most cases the definition was interpreted so that the sample included people who had moved within the same town or within the same part of the county, say from one village to a neighbouring one. In some instances, however, we included local movers who had moved from one environment to another that was different from but very close to the first. We tried to contact and interview 204 local movers for whom we had complete addresses. 30 of these movers were found to be out of scope.

The sample of individuals who were described as in scope, therefore was 1,414 including these local movers.

2.2 The questionnaire

Because the sample consisted of people who had been interviewed previously on the subject of politics and voting behaviour, and because the main intention of the study was to provide information about how opinions and behaviour in this area change over time, the subject matter of the questionnaire owed much to the questionnaires used on the earlier waves in 1969 and 1970. Its design was the responsibility of the researchers of the British Election Study at the University of Essex. It began with a short section of questions about newspaper readership, politics and the media; people were asked to evaluate the political bias of the morning daily paper(s) they read, and to say

how much interest they had in the recent general election campaign of February 1974 (questions 1 - 3b). The next section consisted of open ended questions probing respondents' likes and dislikes of the major political parties, including the Scottish Nationalist Party and Plaid Cymru in Scotland and Wales respectively (questions 4 - 9k). Respondents were asked to contrast the parties' standpoints and say how much difference there was between them. Next respondents were asked how concerned they were about the election results and its impact and about the extent to which "the facts" about issues had been provided (questions 10 - 12). Ten issues were covered in the following section, rising prices (questions 15a - e), strikes (16a - 17f) and the Miners' Strike in particular, (questions 16a and b) taxation, (questions 18a, b) the Common Market, (questions 20a - 1) pensions and social security, (questions 21 and 22) immigration, (questions 23 - 27d) trade union power, (question 28), big business power (question 29), nationalisation (questions 30a - g), and control of wages and salaries (question 31). A few less important issues were also touched on.

On the major issues five aspects were examined, the respondent's own view of what should happen, his view of how the parties' stood on the issue, the importance of the issue in his voting decision, his assessment of how well he understood the issue, and the party he preferred on the issue. On some issues no disagreement on what should happen was expected, thus almost all people would accept the only policy for rising prices is to slow down or stop the rise. On such issues the last three aspects were examined.

The following section (questions 32 - 43) covered voting behaviour at the general election, preceded by two questions asking respondents to assess the effectiveness of the parties to "do what is right" when in power (32 - 33). This led into a section (questions 48 - 54) on general party support and on an overall assessment of the main political parties and party leaders. General questions were then asked about the respondent's circumstances and his expectations (questions 55 - 61) In the penultimate section (questions 63 - 70) questions were asked about personal characteristics, including trade union membership and social class identification..

The questionnaire was concluded with a number of questions on tenure, occupation of respondent, mobility, marital status, and income (77 - 93). A copy of the questionnaire as used in the survey is included in the appendix. The questionnaire was piloted in draft by members of the British Election study research team. In the main survey it was estimated that on average it took 45 - 50 minutes to complete. Aspects of the layout of the questionnaire, introduced by the University of Essex, were new to SCPR interviewers. These innovations all of which seemed acceptable and easily followed, were pointed out to the interviewers. In detail the new factors included

1. Most questions were precoded. But whereas on most questionnaires of this sort the code numbers are listed in a right hand margin, on this questionnaire the codes were listed in the left hand margin. This has the advantage that the answer is generally closer to the code, reducing recording error.
2. Comment spaces were provided on almost all questions, so that interviewers could jot down into the appropriate questions the various asides made by the respondent during the interview. On most questionnaires comments are written in wherever there is room.
3. In many surveys using prompt cards, the show cards are numbered or lettered consecutively from 1 or A. In this survey the show cards were given the same number as the questions at which they were to be used. Instructions were printed on the questionnaire to remind interviewers to use show card _____, and there were instructions to remind interviewers to take back the show card at the appropriate place. This system has subsequently been adopted on other SCPR surveys.
4. In most surveys certain questions are not asked of everyone. People who are not meant to be asked are instructed to skip to a later question by a skip instruction in the far right hand margin opposite the appropriate code of the earlier question

Example 1 Skip instructions SCPR layout

		Col / Code	Skip to
6a)	Many people do not manage to vote at general elections How likely do you think it is that you will manage to vote on February 28th?	(11)	
	<u>SHOW CARD A</u> Definitely will not Rather unlikely to May not be able to Hope to but not absolutely sure Definitely will (Don't know)	1 2 3 4 5 6	Q.7a)
	<u>ASK ALL EXCEPT "DEFINITELY WILL NOT"</u>		
	b) If you do vote, for which party do you think you will vote?		
	<u>IF "UNDECIDED" OR "REFUSED"</u>		
	c) Which party do you tend to support?	(b) (12)	(c) (13)
	Conservative	1	1 Q 6d)
	Labour	2	2 Q.6d)
	Liberal	3	3 Q 6d)
	Other	4	4 Q 7a)
	Undecided	N	5 Q 7a)
	Refused to say	N	6 Q.7a)
	<u>FOR ALL THOSE MENTIONING "CONSERVATIVE/LABOUR/LIBERAL AT b) OR c)</u>		
	d) How strongly do you support the Conservative/Labour/Liberal party?		(14)
	Do you support it . READ OUT		
	Very strongly	1	
	Fairly strongly	2	
	Not very strongly	3	
	Not at all strongly	4	
	(Don't know)	5	

In this questionnaire, however, the rule was to follow the left hand margin through every question until a code was rung that had to the left of it an arrow, and to the right an instruction about which question to skip to In both systems these instructions were reinforced by a description above the question, saying who should be asked the question.

2 3 Briefings

Interviewers on this survey were personally briefed in three day-long briefing sessions in Birmingham on March 6th, in York on March 8th and in London on March 13th. Because of the short time available to arrange the briefings, certain interviewers were unable to attend, these 13 were personally briefed at further briefing sessions arranged by the Centre for Sample Surveys Ltd., which was responsible for the briefing and fieldwork. Almost all the 64 interviewers working on the survey were members of the CSS panel of accredited interviewers

At the briefing sessions the survey was introduced and briefly described, the sample was discussed, and the organisation of the interviewing and of the questionnaire was examined. The major part of the briefing consisted of two trial interviews where interviewers were allotted sections to ask in turn, and points arising, difficulties, ambiguities etc. were discussed. In the appendix there is a copy of the project instructions that formed the basis of the briefing.

2 4 Letters to respondents

Every respondent was given a letter at the beginning of the interview on British Election Study note paper describing the study and its purpose, explaining the sampling in brief, confirming the survey's impartiality pointing out that answers would be treated in strict confidence, and asking for co-operation. A copy appears in the appendix.

At the second stage, a rather longer letter, also on British Election Study notepaper was sent to people who had refused to co-operate, or who had broken appointments to be interviewed. This stressed the importance of gathering everyone's views for the sake of accuracy, and emphasised confidentiality. In a postscript a report of some of the findings was offered as an inducement to respondent's co-operation.

Two special cases of refusals emerged in the first stage. First a few respondents refused because they could not recall being interviewed in 1970. For them a second postscript was added as follows

P P S We understand that you have no recollection of being interviewed in 1970. It is possible that an error was made at Nuffield College in keeping records, but even if you were not interviewed, we would be grateful if you could spare the time to be interviewed now, as we really do want to represent everyone's views.

Second, at the time of the interviewing certain student activities at the University of Essex received a good deal of national publicity. Some respondents refused to co-operate because of their unfavourable view of the University. Their special postscript read as follows

P P S We understand that you may have strong feelings about the recent events at the University. We too feel that it would be a pity if the activities of a group of students were allowed to interfere with the important academic work of the University, and hope you feel able to assist us in this project.

3. THE FIELDWORK STAGE

3.1 Timing

The interviewing began after the briefing sessions, so that some interviewers were able to start on March 6th. In the first stage of interviewing it was assumed that local movers would not be followed and interviewed, though interviewers were asked to find out addresses of movers. This stage was completed on April 14th.

The second stage consisted of interviewing local movers and trying to interview certain of the non-contacts in the first stage, particularly refusals, and those who broke appointments or with whom no contact was made. This stage began on April 11th and was concluded on May 19th 1974.

3.2 Response

1,816 addresses were allocated at the beginning of stage I. Since all movers were defined as out of scope at this stage, these 1,816 addresses produced 1,246 in scope individuals 928 of whom were interviewed successfully. At stage II 454 addresses were issued, 204 local movers, and 250 non contacts at stage I. These produced 418 individuals who were in scope, 185 of whom were successfully interviewed. In detail, 174 in scope individuals were produced from the 204 local movers, and 127 of them were contacted and interviewed. Understandably almost all the 250 non-contact addresses produced in scope individuals (244 in total), 58 of whom consented to be interviewed.

Overall, 1,113 individuals or 78.7% of those in scope were interviewed. In table I (on page 9) the full analysis of response is given. Productivity rates varied from region to region. Taking the number of individuals interviewed as a proportion of all addresses issued (whether in or out of scope), the proportion of productive interviews ranged between 46.7% in Greater London and 73.5% in Wales. The appendix (pp. XI-XIII) shows the response rates in each constituency in the sample, within regional groups.

3.3 Re-issues

A larger proportion of non-contacts than is usually re-issued in national surveys was re-issued at the second stage of this one. And the response rate among these re-issues was low. The 250 non-contact re-issues produced only 58 productive interviews, a conversion rate of 23%. In table 2 overleaf a detailed analysis of stage II, including local movers shows that these local movers were most likely to provide interviews, 62% of all "local movers" re-issues, including both out and in scope addresses were productive. The next most productive group was that of people with whom no contact was made at stage I, about half of whom were eventually interviewed. Only about one in six of those who had refused assented to an interview at the second stage, even though in most cases they were visited by a different interviewer from the one who had originally contacted them.

3.4 Quality control

Members of the Centre for Sample Surveys interviewing panel are regularly accompanied on surveys on which they accept work. So the fact that two interviewers only were personally supervised on this project is of little consequence. This rate of personal supervision was, however, lower than is usual because of the short time available to set up such supervision. One batch of work was subject to personal recall check, and all interviewers' work was checked for completion in the office by the field controller.

The second stage also afforded quality control checks, since in most cases areas were covered by different interviewers from those who had worked there in stage I.

3.5 Reports from interviewers

Most of the verbal reports received from interviewers showed that they had enjoyed interviewing on the survey. Their co-operation and hard work resulted in their achieving the target initially envisaged by the sponsor. An apparently hard core of resistance to the subject of the survey is shown by the small proportion of people who refused at stage I who co-operated at stage II.

4. MISCELLANEOUS COMMENTS

4.1 Analysis

On receipt of the questionnaires from the interviewers, staff in the Centre for Sample Surveys Ltd. checked in the questionnaires within constituency, providing weekly response breakdowns, from these daily counts. Subsequently the original British Election Study serial number was transferred onto the questionnaire and the questionnaire was carefully checked for completeness. No further analysis of the answers was made. The research team from the British Election Study was responsible for the coding, editing, punching and computer analysis of the panel survey. Preliminary results are expected at the end of 1974.

4.2 Comment on "paid" respondents' response rate

In the 1970 survey, a number of respondents who had declined to co-operate initially were recontacted and promised payment of a guinea (£1.05) if they were interviewed. From the index cards of respondents in the 1974 sample it appeared that 338 individuals had been paid in 1970. We felt it interesting to discover whether this group was noticeably less willing to co-operate in 1974 than other people. Of the 338 individuals, 70 were excluded either because they had died or moved away, or because their address was untraceable. 200 of the remaining 268 agreed to be interviewed, a response rate of 74.6%, as compared with 78.7% for the sample as a whole. 33 of those who did not co-operate, positively refused and a small number of others seemed to make themselves unavailable. 12.3% of these in scope "paid" respondents refused to be interviewed. Table 3 shows a complete analysis of response of this group. However, even if the rate of co-operation is considered significantly lower, we cannot say whether payment last time predisposed them to be less co-operative this time, or whether they were predisposed to be less co-operative, with or without payment.

P 325

THE BRITISH ELECTION STUDY

March 1974

INTERVIEWERS' INSTRUCTIONS.

1. Purpose of the Survey

In 1969 David Butler, a well known Oxford political researcher, and Donald Stokes, an American political scientist, organised a panel survey of British electors to update the findings of an earlier panel survey they commissioned in 1963, and whose results appeared in a book "Political change in Britain". Most commentators accept that this book is one of the best surveys on British voting behaviour available. This series of election studies is now continued at the University of Essex under the direction of Professor B. Sarlvik, Mr. I. Crewe, and Mr. J. Alt. SCPR and CSS have been asked to contact those who were originally interviewed on the 1969 survey, as well as those who were subsequently interviewed in July 1970, and re-interview as many of them as are still at the same address.

The results of this survey will contribute to a second book which with your help could be equally as successful and influential.

A second survey of a fresh panel of electors is being done at the same time as our survey.

2. Your Sample

1. The contact sheet

You will be given contact sheets listing the names and addresses of people who were interviewed in July 1970 (on the second wave of interviews). Those contact sheets will also have on them certain other details which are important for you to know.

These include

- 1) whether the respondent is not in the same area of the constituency as most others. These people have an asterisk after their address in the address box,
- 2) whether other information collected last time is likely to be useful to you - this contact information is listed in the right-hand column of the contact issue sheet. But it does refer to July 1970 and may have changed since then

Also on the contact sheets are

- 1) the sample area number, or constituency number, which is a two-digit figure in the range 01 - 80.
- 2) the serial number of each respondent in that constituency, again a two-digit figure in the range 01 - 35.

2. Whom you should interview

You will find all this information necessary in locating the address of the

respondent and contacting the named person We are only interested in interviewing the named person, who was interviewed in July 1970 and whose name is on the contact sheet Do not take any substitutes under any circumstances

Furthermore we are only being asked to interview those who are living at the same address as they were in July 1970, and which is on your Sample Issue Sheet It is very important that you make every effort to find out the new address of those who have moved, so that they can be contacted later on. New addresses must be recorded on the contact sheet and forwarded to the London office as quickly as possible.

3. Letter of introduction

You have a letter of introduction which you should hand to your respondent at the beginning of the interview This should help you in gaining co-operation. Remember these people have been interviewed before on the same subject and they may not be as eager as usual to be interviewed. But you should try and impress upon them how important this interview is to the success of the survey.

Always show your identity card before interviewing, whether you are asked to show it or not.

You will notice that the letter of introduction stresses that all the answers given by the respondent are completely confidential THIS PROMISE APPLIES TO YOU. You should never reveal the answers given to anyone not employed by Centre for Sample Surveys Limited.

4 Calling and recalling

Call at each address on your Sample Issue Sheet. If you meet the person you should be interviewing either interview at once, or make an appointment for a more convenient time Remember that the questionnaire takes about an hour to do

If you do not meet the correct person, or if you get no answer, call again AT LEAST THREE MORE TIMES. These calls should be at different times of the day, on different days of the week, or weekend At least one of these calls should be outside working hours after 6 p.m. or at the weekend

You may find the contact information on the Sample Issue Sheet helpful in fixing which are the better times to call

If you discover someone is on holiday, try to find out when he/she is likely to be coming back and call after that date This does mean that you should try and contact all your sample as soon as possible after the briefing, so that you get to know where they live and when they are likely to be available, and thus achieve a very high contact rate indeed We rely on your expertise and experience to achieve this very high contact rate

5 Interviewing - General points

The general theme of the questionnaire is politics From where we are during the election) the result seems likely to be very interesting indeed. It may be that individuals in each household will be more independent with their vote, it may that members in the household disagree about politics. For all these reasons we ask you to try and get the named respondent into a separate room, if possible. If it is not possible and someone else is in the room, make it clear who it is you are interviewing, if the wrong person answers, repeat the question to the respondent and record his (or her) answer There should be no exceptions to this rule

Please always write on the questionnaire in black ink or black biro or black felt tip pen Blue is the second choice and red is reserved for use in the office Black tends to stand out more clearly than blue

Let us review the technical innovations of this questionnaire, which was designed by the University of Essex

1) Codes

The codes that should be rung to record the respondents' answers are in general in the left hand margin, beside the appropriate answer. They are not on the right hand side of the page

2) The margin filters and skip instructions

The rule with this questionnaire is to follow the margin through every question unless you ring a code with an arrow to the left and to the right of it. The arrow to the left of the code number reminds you to look to the right to find the skip instruction. Always continue to the next question unless instructed otherwise. Most questions on the questionnaire are, however, asked of everyone. You will find that with very few exceptions they are quite straightforward

3) Comment space

On almost every question you have been given space to write down any comments that the respondent may give, relevant or irrelevant. Please use them whenever such a comment may illuminate a particular answer. Use the comment line to record any answer which appears not to fit the codes provided, try nevertheless to make the code which you feel is closest to the response. Remember that since these questionnaires are being coded and analysed by the sponsor you should write extra legibly

4) Question numbering

A parallel sample of electors are being interviewed at the same time as this, on a longer questionnaire, which incorporates a number of the same questions. That is why you will find frequent notes like, for instance,

Questions 9A, B, C, D, E, F, G not on this questionnaire

Just be careful with the skip instructions

5) Show Cards

The show cards are given the same number as the question in which they are used. This number is in the bottom right hand corner of the card

6) A very few respondents were paid last time for co-operating, but this will not be happening this time so it will not concern you.

Those are the unusual features of this questionnaire. Now may I remind you about the common practices of which almost all of you will be aware

Though at most questions the response is recorded by putting a ring around the respondent's answer (which number is to the left of the answer), please write in any other answers or comments the respondent may give. They will help do justice to the richness of the respondent's feelings, or throw light on his understanding of the question

At the open-ended questions (e.g. 4,5,6,7,9H,9I) it is vital to write down what the respondent says to you as completely as possible. When you shorten responses, do not replace key words the respondent has used - for instance, if the respondent says "inflation" write "inflation" and not "rising prices". Also make sure you record all the various points the respondent has touched on. Probe very carefully, firstly by asking if he/she has anything else to say on the subject, and secondly by asking

him/her to explain more precisely what he means. Answers like "It's the best party for the country" or "I just don't like it" are not good enough. The probe for the first type of answer should be "In what ways is it the best party for the country?", and for the second "what don't you like about it in particular?" Please probe very carefully indeed because these open-ended questions are really most important and can be terribly useful if well probed

All questions should be read out as written, they should not be rephrased either to start with, or as a repeat, unless the detailed instructions in this manual allow you to do so. Only if you follow this rule completely, can we be sure that all the respondents are answering exactly the same question

This is particularly important when you read out the possible answers (as in the scale questionnaires) and/or when you use a show card. If for instance at 3B the respondent says "a lot" then repeat the question and ask the respondent to choose one of the answers you read out in the question. "Teaching" the respondent the rules of the game from the beginning will save you and him a lot of time.

6 The questionnaire

Question Number

Comment

1

Please follow the instructions very carefully. First if the respondent does read a daily morning newspaper regularly, write down its name under A - and the name of any others he reads also regularly underneath. Notice that we are not interested here in Sunday newspapers or Evening newspapers or weeklies. But clearly daily morning newspapers include local, regional and national newspapers

For each newspaper mentioned as the second part of the question "Would you say that takes sides for one of the parties? If YES which party is that?" If no party or the respondent does not know, write in clearly "No" or "DK" - please stick to these otherwise there may be confusion

If the respondent does not read a newspaper regularly, circle NONE in the first line of capitals under the question, e.g

Do you read a morning daily newspaper
Any other morning newspaper?

IF NO NEWSPAPER, CIRCLE (NONE) AND GO TO 2

If there are any other comments, write them in on the questionnaire

2

If any emphasis is needed, emphasise "newspapers" and "politics", i.e. the words underlined. Code the answer by ringing the number to the left of the margin by the appropriate answer.

3A

Again place the emphasis on the underlined words, if you need to emphasise anything

3B

Of course we are here talking about the 1974 General Election campaign, culminating in the election on February 28th.

4

The first of the series of open-ended questions which, as you can see, give you plenty of room for the answers, and also which you can see are very important questions. PROBE VERY FULLY AND CAREFULLY. Vague and general answers like "I just like them" or

"They're the best party for the country" are quite insufficient. Probe, probe and probe again until there is nothing more that the respondent wishes to say on the question. Remember "Is there anything else?" is only one of the standard probes, others will no doubt be "In what way is it good/the best party?" or "Can you tell me more about why you think?" Do use the full range of probes WITHOUT, or course, PROMPTING.

- 5 - 7 The same comment about probing applies to the next three questions. Please do probe most carefully.
8. You may expect comments and questions at this question, because some people may think it means to refer just to the Conservative and Labour parties, some people may think it applies to the Conservative and Labour and Liberal parties, or some other combination. It is important that you do not interpret this question any further. If the respondent wishes to answer about all three record his answer as appropriate. There is a chance that he says one thing for one pair of parties and another thing for another pair. Do make sure you record which answer applies to which pair of parties. And do please write in any comments.
- 9A - G These are excluded from this questionnaire.
- 9H, I Another pair of important open-ended questions that must be fully and most carefully probed. We know rather less about people's attitudes to the Liberals, which only makes these questions even more vital. Probe fully using the full range of probes, until the respondent has nothing else to say.
- 9J, K To await briefing.
10. Code in the answer on the left of the margin and write in the comments.
11. Read this question out carefully, the word to emphasise to help clarify it is "solve" the major problems'.... Record any comments or questions the respondent may ask.
12. Again, note the words that may need emphasis.
- 13 - 14 Excluded from this questionnaire
- 15, A, B Here you should use the first of the show cards which have on the bottom right hand corner the question number for which the card is to be used. Hand the card to the respondent before you ask the question, and then read out the question in full, to include the answers which are on the card. You use the same card for both questions and after 15B you should take back the card.
- 15C The respondent should no longer have the card here. Read out the question carefully since it is rather long. Note that we ask the respondent how important it was to himself.
- 15D If necessary emphasise the underlined words for clarity.

- 15E You should read out the response alternatives carefully
- 15F Excluded.
- 16A, B Use the second show card here, marked 16A, B in the bottom right hand corner. Give the respondent the card before asking the question After 16B retrieve the card
- 16C, 17A, B Excluded
- 17C You should encourage the respondent to answer the question as it appears on the questionnaire, Notice that the question refers to "Strikes" not to the Miners' strike in particular
- 17D Notice the words to emphasise. Again one is talking about strikes in general, not the Miners' strike in particular
- 17E, F Again we are talking about strikes in general Please if necessary emphasise the underlined words.
- 18A Show card 18A before reading out the question Read out the five alternatives also Retrieve the show card after having coded up the answers and before asking 18B.
- 19A, B, C Excluded.
- 20B Another question which you should read out slowly and carefully. Show card 20B, C, D, E, F (which is just one card) for this and the following questions Remember to read aloud the four answers on the card which are also on the questionnaire
- 20C Use the same card. With this one, you record the statement number in the box on the left hand side of the margin. The statement number you record refers to the statement which the respondent was closer to before he changed his mind and agreed with the statement he mentioned at 20B So 20C statement number, if there is one, should be different from 20B code.
- 20D Same card. Similar routine, record the statement number in the box provided.
- 20E, F Same card Similar routine as 20D. After 20F retrieve the card.
- 20H One or two may mention some other party. If so record it, with any other comments.
- 20J - L Excluded
21. Stick carefully to the question as it is on the questionnaire.

- 22 The comparison is again between just the Conservative and Labour parties, press the respondent to answer the question
- 23 Here is the first skip or filter. Notice the → to the left of code 8 by don't know This reminds you look to the right, where you will find the 'skip to' instruction (to question 26) But this skip to instruction only applies to those who do not know at question 23, not to other answers there. If response was code 1 or 2, continue as usual to the next question (24)
- Record comments in the space provided as exactly as possible.
25. "Around here" refers to the area about the address at which he lives.
26. Respondents may tentatively suggest figures. Those are what we would expect you to record.
- 27A - D Show card 27A, B, C, D for this question and the following questions until 27D Read out the alternatives at 27A. The statement number is the same as the code number to the left of the margin. After 27D retrieve the card.
- 30A - D The card to use here is 30A, B, C, D. Read out the alternatives in full at 30A, then remember to check the appropriate statement number when you write them in the boxes at 30B, C, and 30D. Retrieve the card after 30D's answers have been written in the appropriate box
- 30F There is a chance that one or two respondents will mention another party besides the three on the questionnaire. Record it and any comments.
- 32, 33 If the respondent does not answer in the terms on the questionnaire, re-read the question.
34. Your second skip to experience. This is the first question of a series (upto 43 inclusive) when you must be awfully careful with the skips. Those who did not vote or who refuse to say whether or not they voted should skip to 43. All others continue
35. Obviously this is only asked of those who said they voted (at 34). Here again be very careful about following the skip to instructions. These are in summary.
- | | | |
|------|---|-------------------|
| 1) | Plaid Cymru (Welsh Nationalist) and Scottish Nationalists | Ask next question |
| 11) | Conservative, Labour and Other party supporters | Ask question 37 |
| 111) | Liberal voters | Ask question 39A |
| 1V) | Those who do not remember how they voted, or refused to say | Ask question 48 |

36. You pronounce Plaid Cymru "plied kumru" - plied as in plied with drink or pliers, kumru with a short 'u' as in a short 'look', and a short r as in rick or sick
- Choose the appropriate words and ask only those who mentioned that they had voted Plaid Cymru or Scottish Nationalist at the election in question 35 Then ask the next question, 37.
37. Liberal voters at 35 are not asked this question. They should have skipped to 39A But Conservative, Labour, Scottish Nationalist, Plaid Cymru, and Other party voters should be asked this. Here again follow the skip instructions most carefully. Those who said that no Liberal candidate stood in the seat should be asked the next question 38. Those who say a Liberal was standing skip to 39B, the don't knows to 40.
38. This question is only asked of voters who say no Liberal stood in their constituency. After this they all go to 40. (Of course, this cannot include Liberal voters).
- 39A
39B This is only asked of Liberal voters at 35, who are joined at 39B by those living in constituencies where a Liberal did stand (as reported at 37)
- 40, 41 Is asked of all those who voted, and who did not refuse to say for which party they voted, at 35.
42. Watch the skip instructions here. If respondents are asked 42 then they should skip 43 and go to question 48.
43. Is only for non-voters at 35.
- 44 - 47 Excluded
48. Everyone should be asked this question. Notice that we are now not talking about voting at the election but talking in general about parties This is the first of another series of questions where it is important to follow the skip to instructions very carefully. Notice that the following questions (50 - 54) refer back to answers at this question and no earlier question. You may well find people who say at 35 that they voted Conservative or Labour or Liberal at the election and who consider themselves in general a supporter of no particular party. And of course there are many other possibilities. From 48 on, the answers to question 35 are not referred to. We only refer back to 48. So watch the filters.
- 49 If they say none or refuse to say at 48 ask them 49, and follow the skips
- 50A, B Are only asked if they think of themselves as Conservatives at 48 or think themselves as closer to the Conservatives than other parties at 49.
- After 50B, skip to 54.
- 51A, B Are asked only if they think of themselves as Labour at 48 or think they are closer to Labour than to the other parties at 49
- After 51B, skip to 54.

- 52A, B, C Are asked only if they think of themselves as Liberal at 48 or think they are closer to the Liberals than to the other parties at 49.
- After 52C skip to 54
- 53A, B Are asked only if they think of themselves as supporters of one of the other parties at 48 or closer to one at 49. Then on to 54.
54. Everyone is asked question 54. Here you are using a relatively simple scaling technique asking respondents to give marks out of 10 for at least seven separate items. The marks are written in the boxes left of the item and of the margin. Do please write in the marks clearly.
- Marks correspond to the old fashioned marking system used at schools - 0 out of 10 for something awful, 10 out of 10 for something very good indeed. Except here one is marking parties and politicians using the system. If need be, explain it in those terms. Remember to record one as 01, two as 02 etc. Don't know is DK, but remember to be very clear when filling in the boxes.
- 57B Note the emphases.
58. Again note the words you may need to stress
- 59, 60 Excluded
62. Excluded
63. Slightly unusual recording technique here Be methodical. If the respondent is not a trade union member, write 'no' under NAME OF UNION on the first line. Then ask "Is anyone else in this household a member of a trade union? If YES who is that? Which union is that?" for every union member in the household. For each of them record their relation to the respondent under PERSON on the left of the grid. Please get as full details as possible about union membership
- 64, 65 Excluded.
67. Watch the skip to instructions here. If the respondent says either "middle (class)" or "working (class)" but nothing else, then skip to 69A. Otherwise write in precisely what was said and ask the following question 68.
- 68 - 70 Are straightforward. Do write in any comments made by respondents on these questions.
- 71 - 76 Excluded.
77. Respondents may have their house/flat with their Job. If so, write that in and we shall deal with it in the office. Do ask if they pay anything on it, if they do. Otherwise follow the instructions carefully.

78. Write in the number of years in the appropriate space, and the number of months, if they can recall it. Do try and get an estimate of the number of years if the respondent is unable to say precisely how many he has been at that address
79. Previous residence should be described in enough detail to be clear
80. "Grew up in" includes the major part of the respondent's childhood - write in clearly particularly if it is somewhere unusual.
- 81B. More than one answer is possible here; record all those mentioned, writing in clearly.
82. Again be clear when you write in the birthdate.
- 83A - 85 Watch the skip instructions very carefully indeed here. If respondent has a paid job probe carefully for full details, and follow through to 84A which gathers more job details. If respondent ~~says she~~ is a housewife (and does not mention a paid job) skip to 85. Students go to 86, those who are retired, or temporarily unemployed for whatever reason go from 83A to the next question 83B. Probe carefully for a very full job description, "engineer" is utterly useless, for instance
- 86 All respondents are asked question 86. Record whether they are male or female by ticking the appropriate box. If the respondent is divorced, widowed or separated circle the word that applies in the same way as in Question 1. Then follow the skips.
- 87A - F Married women only should be asked this sequence about their husband's job status. Again probe carefully for fullest details on the kind of job done, the industry in which he works, and his responsibilities. Follow the skips very carefully.
- 88A - B Is for married men only and asks about wife's job. Probe for the fullest details possible about the job at 88B.
- 89 - 91 All respondents should answer this. Again comments are likely to be made. Please write them down.
- 92A Use show card 92A here, and make sure you ask the appropriate question. If respondent is single (including widowed, divorced, or separated) ask the first question. Otherwise ask the second, for married people. Write in the letter chosen only.

The income question is probably one of the most important classification questions on the questionnaire. It is important that we should be able to relate people's political beliefs to their income.

The question has been deliberately phrased very impersonally - never ask the respondent for income but for the letter on the card.

The question has been used in a number of social and political surveys, and very few refusals are encountered if you approach the respondent properly, confidently and above all with no hint at all that the possibility of a refusal has ever crossed your mind. Phrases such as "I hope you don't mind my asking" or "of course you don't have to say if you don't want to", or "I'm afraid I have to ask ." should NEVER, NEVER be used

Show the respondent the income card and explain that you want to know the code letter (A,B,C, etc) which is opposite the range into which the income comes. The card shows income groups which are suitable either for people who think in weekly amounts or monthly amounts. If a weekly wage earner gets different amounts each week ask him to try to give an average over the past year - BEFORE THE THREE DAY WEEK CAME IN. That is why we ask about usual income.

Remember to prompt for income from all sources:

- investments
- pensions
- rents
- welfare payments (e g. maternity benefits)

Some respondents may find it helpful if you jot down the actual figures for them, and add it up at the end to get the correct group.

After the interview thank them kindly for their co-operation and ask them whether they would mind co-operating on a similar venture in the future. If they positively refuse, record that on the questionnaire.

Remember to complete the green Contact Sheet as well. We need one Contact Sheet completed for every named person on your Sample Issue Sheets. If you obtain an interview, attach the Contact Sheet to the front of the completed questionnaire. If you are unable to obtain an interview for any reason, send back the Contact Sheet with your grey Daily Progress Sheet.

Remember that new addresses should where possible be recorded on the contact sheet, although you will not have carried out the interview when someone has moved.

GENERAL ELECTION STUDY

March, 1974

General Information and Administration

1. Survey Materials

Check that you have the following materials with you before you begin each day's work in the field:

- Your Identity Card
- Enough questionnaires for the day's work
- Enough contact sheets for the day's work
- Sample Issue Sheets
- Introductory letters
- Daily Progress Sheets
- Several blue or black biro's
- Interviewers' Instructions
- Income Card and 6 Show Cards

At home you need a supply of Weekly Return Sheets (for claiming pay and expenses) and a supply of pre-addressed envelopes for returning work.

2. Contact Sheet

We need a completed green Contact Sheet for every address listed on your Sample Issue Sheets. If you have successfully carried out an interview, attach the Contact Sheet to the front of the completed questionnaire. If, for any reason, you have failed to achieve an interview, ring the appropriate code(s) on the Contact Sheet and send it back to the office with your Daily Progress Sheet.

We may decide to follow up those who have moved house since they were last interviewed. So when you come to an address from which the named person has moved, or an address where he is not known, try to find out the named person's new address. If the new occupants don't know it, try asking neighbours, etc. If you do discover the new address, write it in Section D at the bottom of the Contact Sheet; but do not visit in an attempt to get an interview unless asked to by the Office.

3. Field Control

Your Field Controller at the London office is Sandra Chuter. You should contact her about all problems as to where or when you should work, about specific queries over your sampling point, and returned work.

You may have queries about how to carry out the interview which are not covered in the Interviewers' Instructions. If you do, you should contact Sandra. If she is not available, the Field Manager, Daphne Stegals will help you with any problem you may have.

Please make every effort to finish the assignment(s) you have been given. If, for any reason, you are unable to complete an assignment, do not send it back before you have telephoned the Office to explain the circumstances. If you give us advance warning of problems over timing, we may be able to allocate the work to another interviewer without delay.

4. Return of Work

Please send back work as soon as possible after each day you spend in the field. Don't hold back several days' work to post all at once. A steady flow of work each day will make our job of booking in much easier. Post your work back by first class mail.

Each batch of work you post must be accompanied by a completed grey Daily Progress Sheet. The Daily Progress Sheet is a record of the final outcome of your calls at households - either completed interviews or a finally unproductive call (eg the fourth visit at which your respondent is not at home). One more point about the Daily Progress Sheet - if you are working in more than one constituency, use a different Daily Progress Sheet for each area (even if you have only one household recorded on each sheet).

At the end of the survey assignment, all unused survey material must be returned to the office. It is particularly important that you return all your yellow Sample Issue Sheets. Final payment cannot be made until we have received your last Sample Issue Sheet(s) at the office.

5. Fees and Expenses

We are paying a standard fee of 25p for every address in your assignment at which you attempt an interview. In order to claim this fee, you are expected to try to contact each household at least four times, at different times of day and on at least three separate days, in attempts to find the occupants at home. (Use your Sample Issue Sheets to keep records of when you call and of any appointments you make.)

In addition, we are paying a fee of £1.25p. for every successful interview you carry out. This means that you may claim 25p + £1.25p = £1.50p for each interview. If it turns out that your sampling point contains a very large number of unproductive addresses, let Daphne Steggals know. We shall be willing to consider claims for time spent on making a large number of unproductive calls.

The fee payable to interviewers attending one of the briefings (on the 6th, 8th or 13th March) is £4.00.

Travelling time to and from the briefing and to and from the interviewing area may be claimed at 35p per hour. Where economical, public transport should be used and the cost claimed for. Otherwise car mileage may be claimed for at the standard rate of 5p per mile. It is expected that no more than one journey per day to the interviewing area and back will be claimed for, unless permission has been obtained from the office.

Details of all journeys claimed for and other expenses incurred (supported by receipts) should be entered on the Weekly Return Sheet. Claims for payment of fees and expenses should be sent to Sandra Carter to arrive in the office on Monday. Payment will generally be made within ten days following receipt of the claim, but claims arriving later than Monday may have to be held over until the following week

6 Field Checks

The usual field checks will be carried out on samples of interviewers' work

7 Interviewing Deadline

All work issued, either at the briefing or during fieldwork, must be completed in time to reach the office by Monday, 1st April. Please contact the office well in advance if you think that you may have problems in meeting this deadline

We are conducting a major study of people's views about life in Britain today and their feelings about the recent election. We hope you will help us in our project, as we feel it is extremely important that people have the chance to express their views on these matters. We believe the study will be of great interest and importance, and its results will be made public as a book.

This research is entirely impartial -- it is being conducted by a university and has nothing to do with the Government or any political party. Your name and address will be kept strictly confidential. Every registered elector in Great Britain has had an exactly equal chance of being asked to give his or her views. It is extremely important that you and all the others selected agree to be interviewed in order to guarantee that the results are accurate and reliable.

Your assistance is particularly valuable since you were interviewed in 1970 in an earlier part of this study. The research, which was begun at the University of Oxford, is now continuing at the University of Essex.

Thank you very much for your help.

Telex 98440 (UNILIB COLCHSTR)

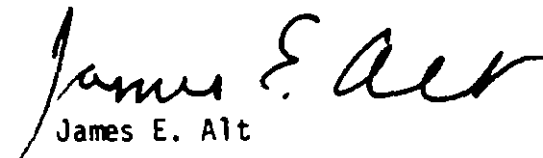

April 1974

We are asking you to help us carry out a major piece of research. The British Election Study - an independent academic project located at the University of Essex through a Social Science Research Council grant - is continuing the work begun some years ago at Nuffield College, Oxford by David Butler and Donald Stokes. Our purpose is to present an accurate historical record of people's feelings about life in Britain and the recent election. As far as we know, this is the only major study of the election being carried out.

The assistance which has already been given by a large number of people all over Britain has been of very great help to our work. However, to be sure that the book really represents the views of all the British people about life in Britain after the election, it is very important that we should talk to everyone in our sample of people. Whether you voted or not, and indeed even if you do not feel particularly interested in politics, we would be especially grateful if you could spare about an hour of your time to help us with our research, as you were one of the people interviewed after the election in 1970.

We assure you that all your answers will be treated in the strictest confidence and will be used only for the purposes of academic research. It will never be possible to identify the individual giving a particular answer, as names are not written on questionnaires. If you wish to have further information about our study, please feel free to write to me.

Yours on behalf of the British Election Study,

James E. Alt

P.S. If you would like to see a report of some of the findings of the study in due course, please mention this to the interviewer when she calls.

P. 325

Serial no.

This is part of some research being conducted at the University of Essex
For this study we need the answers to some questions which we are asking
people all over the country

1 Do you read a morning daily newspaper regularly? IF YES Which one is that? PROBE
Any other morning newspaper?

IF NO NEWSPAPER, CIRCLE NONE AND GO TO 2

WRITE NAMES OF NEWSPAPERS IN COLUMN A BELOW (NO SUNDAYS OR EVENINGS)

AFTER RECORDING ALL PAPERS, ASK

Would you say that the _____ (NAME OF EACH NEWSPAPER) takes sides for one
of the parties? IF YES Which party is that?

RECORD ANSWER OF PARTY OR NO OR DK IN COLUMN B BELOW

A. NAME OF PAPER

B. PARTY FOR OR NO/DK

1 _____	_____
2 _____	_____
3 _____	_____
4 _____	_____
5 _____	_____

MAKE SURE YOU HAVE COMPLETED COLUMN B FOR EACH PAPER IN COLUMN A

COMMENTS:

2 How closely do you follow newspapers for news and comment about politics -- very
closely, fairly closely, or just once in a while?

- 1 very closely
- 2 fairly closely
- 3 once in a while
- 8 DK

COMMENTS:

3A How closely do you usually follow programmes about politics on television --
very closely, fairly closely, or just once in a while?

- 1 very closely
- 2 fairly closely
- 3 once in a while
- 8 DK

COMMENTS:

3B Generally speaking, how much interest did you have in the recent election campaign
a good deal, some, or not much?

- 1 a good deal
- 2 some
- 3 not much
- 8 DK

COMMENTS:

4 Now I would like to ask you what you think the good and bad points about the political parties are.

Is there anything in particular that you like about the Conservative party?

IF YES: What is that? (Is there anything else?) (PROBE UNTIL NO FURTHER ANSWERS)

REPLIES

5 Is there anything in particular that you don't like about the Conservative Party?

IF YES What is that? (Is there anything else?) (PROBE UNTIL NO FURTHER ANSWERS)

REPLIES.

6 Is there anything in particular that you like about the Labour Party?
 IF YES. What is that? (Is there anything else?) (PROBE UNTIL NO FURTHER ANSWERS)

REPLIES:

7 Is there anything in particular that you don't like about the Labour Party?
 IF YES What is that? (Is there anything else?) (PROBE UNTIL NO FURTHER ANSWERS)

REPLIES

8 Considering everything the parties stand for, would you say that there is a great deal of difference between them, some difference, or not much difference?

- 1 a great deal
- 2 some
- 3 not much
- 8 DK

COMMENTS:

Questions 9A, B, C, D, E, F, G not on this questionnaire

REPLIES:

9K

REPLIES:

		<input checked="" type="checkbox"/>	
--	--	-------------------------------------	--

9J

Is there anything in particular that you like about Plaid Cymru?
IF YES. What is that? (Is there anything else?) (PROBE UNTIL NO FURTHER ANSWERS)

REPLIES

9K

Is there anything in particular that you don't like about Plaid Cymru?
IF YES. What is that? (Is there anything else?) (PROBE UNTIL NO FURTHER ANSWERS)

REPLIES

9L

Generally speaking, do you regard Plaid Cymru as closer to the
Conservative Party or closer to the Labour Party?

- 1 Closer to Conservative
- 2 Closer to Labour
- 3 Neither
- 4 Don't know
- 5 Refuse to answer

REPLIES

10 Would you say that you cared a good deal which party won the election or that you didn't care very much which party won?

- 1 cared a good deal
 - 2 didn't care very much
 - 8 DK
- COMMENTS

11 How much do you think the election will help to solve the major problems that the country is facing -- a great deal, a little, or not at all?

- 1 a great deal
 - 2 a little
 - 3 not at all
 - 8 DK
- COMMENTS

12 Do you think that the recent election campaign generally gave the people the facts about the problems facing the country?

- 1 yes
 - 2 no
 - 8 DK
- COMMENTS

Questions 13, 14 not on this questionnaire

SHOW CARD 15 A, B

15A How well do you think the last Conservative Government handled the problem of rising prices -- very well, fairly well, not very well, or not at all well?

- 1 very well
 - 2 fairly well
 - 3 not very well
 - 4 not at all well
 - 8 DK
- COMMENTS

SAME CARD

15B If the Labour Party had been in power at the time, how well do you think they would have handled the problem of rising prices -- very well, fairly well, not very well, or not at all well?

- 1 very well
 - 2 fairly well
 - 3 not very well
 - 4 not at all well
 - 8 DK
- COMMENTS

RETRIEVE LAST CARD

15C Think about when you were deciding about voting. How important to you when you were deciding about voting was the issue of rising prices -- the most important single thing, fairly important, or not very important?

- 1 the most important single thing
 - 2 fairly important
 - 3 not very important
 - 8 DK
- COMMENTS

15D Some people say that prices will go on rising fast no matter what any Government tries to do. Would you say you agree or disagree?

- 1 agree
 - 2 disagree
 - 8 DK
- COMMENTS.

15E On some issues people feel that they understand the problems that are involved, while on others they tend to feel that they don't really understand what the problems are How well would you say you understand the problem of rising prices -- very well, fairly well, or not very well?

- 1 very well
 - 2 fairly well
 - 3 not very well
 - 8 DK
- COMMENTS

Question 15 F not on this questionnaire

SHOW CARD 16 A, B

16A How well do you think the last Conservative Government handled the events leading up to the Miners' Strike -- very well, fairly well, not very well, or not at all well?

- 1 very well
 - 2 fairly well
 - 3 not very well
 - 4 not at all well
 - 8 DK
- COMMENTS

SAME CARD

16B If the Labour Party had been in power, how well do you think they would have handled the events that led up to the Miners' Strike -- very well, fairly well, not very well, or not at all well?

- 1 very well
 - 2 fairly well
 - 3 not very well
 - 4 not at all well
 - 8 DK
- COMMENTS.

Questions 16C / 17 A, B not on this questionnaire

RETRIEVE LAST CARD

17C Which party do you think has the better approach to strikes, the Conservatives or Labour, or don't you think there is much difference between them on this?

- 1 Conservatives
 - 2 Labour
 - 3 not much difference
 - 8 DK
- COMMENTS

17D Some people say that there will always be a lot of strikes no matter what any Government tries to do. Would you say you agree or disagree?

- 1 agree
 - 2 disagree
 - 8 DK
- COMMENTS

17E How serious a problem do you think strikes are -- very serious, fairly serious, or not very serious?

- 1 very serious
 - 2 fairly serious
 - 3 not very serious
 - 8 DK
- COMMENTS

17F When you hear of a strike, are your sympathies generally for or against the strikers?

- 1 for strikers
 - 2 against strikers
 - 3 depends
 - 8 DK
- COMMENTS

18A Now we would like you to think about how well the Conservative and Labour Parties handle matters of taxation Which of these statements do you agree with?

SHOW CARD 18 A READ ALTERNATIVES 1 - 5 ALOUD

- 1 The Conservative Party is much better.
 - 2 The Conservative Party is somewhat better.
 - 3 There is no real difference between the parties
 - 4 The Labour Party is somewhat better.
 - 5 The Labour Party is much better
 - 8 DK
- COMMENTS

RETRIEVE LAST CARD

18B Think about when you were deciding about voting How important to you when you were deciding about voting was the matter of taxation -- the most important single thing, fairly important, or not very important?

- 8 DK

51B And would you say you are very strongly or not very strongly against the Conservative Party?

- 1 very strongly
- 2 not very strongly
- 8 DK

COMMENTS

NOW GO TO QUESTION 54

LIBERALS AT Q 48 OR 49 ONLY

52A Would you call yourself a very strong Liberal, fairly strong, or not very strong?

- 1 very strong
- 2 fairly strong
- 3 not very strong
- 8 DK

52B Would you say you are very strongly or not very strongly against the Conservative Party?

- 1 very strongly
- 2 not very strongly
- 8 DK

52C And would you say you are very strongly or not very strongly against the Labour Party?

- 1 very strongly
- 2 not very strongly
- 8 DK

COMMENTS

NOW GO TO QUESTION 54

NATIONALISTS AND MINOR PARTIES AT Q.48 OR 49 ONLY

53A Would you say you are very strongly or not very strongly against the Conservative Party?

- 1 very strongly
- 2 not very strongly
- 8 DK

53B And would you say you are very strongly or not very strongly against the Labour Party?

- 1 very strongly
- 2 not very strongly
- 8 DK

COMMENTS

ALL RESPONDENTS

54 Let us say that you gave each of the parties a mark out of ten points -- a mark according to how much or how little you like it. You can give each party any mark from 0 out of 10 for least liked to 10 out of 10 for most liked

WRITE MARKS OUT OF 10 IN THE BOX IN THE MARGIN FOR EACH QUESTION
WRITE 'DK' IN THE BOX IF RESPONDENT SAYS DON'T KNOW

↓

First of all, what mark out of ten would you give the Conservatives?

Now, what mark out of ten would you give Labour?

And, what mark out of ten would you give the Liberals?

IN SCOTLAND ONLY What mark out of ten would you give the Nationalists?

IN WALES ONLY What mark out of ten would you give Plaid Cymru?

Now let's turn to how much you personally like some leading politicians
What mark out of ten would you give Mr Edward Heath?

And what mark out of ten would you give Mr. Harold Wilson?

What mark out of ten would you give Mr Jeremy Thorpe?

What mark out of ten would you give Mr. Enoch Powell?

COMMENTS.

55 Generally speaking, do you regard the Liberal Party as closer to the Conservative Party or closer to the Labour Party?

- 1 closer to Conservatives
- 2 closer to Labour
- 8 DK/no/no difference/equal

COMMENTS

56 We are also interested in how well off people are these days. Do you think that what the Government does makes any difference to how well off you are?

- 1 does
- 2 does not
- 8 DK

COMMENTS:

57A How about you? Compared with two or three years ago, are you and your family better off now, worse off now, or have you stayed about the same?

- 1 better off now
- 2 worse off now
- 3 about the same
- 8 DK

COMMENTS

57B Now looking ahead over the next year or two, do you think that you will be better off, worse off, or will you stay about the same?

- 1 better off
- 2 worse off
- 3 about the same
- 8 DK

COMMENTS

58 Has the last Conservative Government made you better off or worse off, or hasn't it made much difference?

- 1 better off
- 2 worse off
- 3 not much difference
- 8 DK

COMMENTS

Questions 59, 60 not in this questionnaire

61 And what do you think will be the state of Britain's economy in the next few years -- will it stay about the same, get better, or get worse?

- 1 same
- 2 get better
- 3 get worse
- 8 DK

COMMENTS

NOTE 2: Occupational unit groups are a three-digit variable. Occupational orders are a two-digit translation of the roman numeral section headers in the following list.

I. FARMERS, FORESTERS, FISHERMEN

- 001+ Fishermen
- 002= Farmers, farm managers, market gardeners
- 003 Agricultural workers n.e.c.
- 004 Agricultural machinery drivers
- 005 Gardeners and groundsmen
- 006 Foresters and woodmen

II. MINERS AND QUARRYMEN

- 007= Coal mine - workers underground
- 008 Coal mine - workers above ground
- 009 Workers below ground n.e.c.
- 010 Surface workers n.e.c. - mines and quarries

III. GAS, COKE AND CHEMICALS MAKERS

- 011 Furnacemen, coal gas and coke ovens
- 012 Chemical production process workers n.e.c.

IV. GLASS AND CERAMICS MAKERS

- 013 Ceramic formers
- 014 Glass formers, finishers and decorators
- 015 Furnacemen, kilnmen, glass and ceramic
- 016 Ceramics' decorators and finishers
- 017 Glass and ceramics production process workers n.e.c.

V. FURNACE, FORGE, FOUNDRY, ROLLING MILL WORKERS

- 018 Furnacemen - metal
- 019 Rolling, tube mill operators, metal drawers
- 020 Moulders and coremakers (foundry)
- 021 Smiths, forgemen
- 022 Metal making and treating workers n.e.c.
- 023 Fettleers, metal dressers

NOTE 2 (CONTINUED):

VI. ELECTRICAL AND ELECTRONIC WORKERS

- 024 Radio and radar mechanics
- 025 Installers and repairmen, telephone
- 026 Linesmen, cable jointers
- 027 Electricians
- 028 Electrical and electronic fitters
- 029 Assemblers (Electrical and electronic)
- 030 Electrical engineers (so described)

VII. ENGINEERING AND ALLIED TRADES WORKERS N.E.C.

- 031: Foremen (engineering and allied trades)
- 032: Trainee craftsmen (engineering and allied trades)
- 033 Sheet metal workers
- 034 Steel erectors; riggers
- 035 Metal plate workers; riveters
- 036 Gas, electric welders, cutters, braziers
- 037* Turners
- 038+ Machine tool setters, setter - operators n.e.c.
- 039= Machine tool operators
- 040 Tool makers, tool room fitters
- 041* Motor mechanics, auto engineers
- 042* Maintenance fitters, maintenance engineers, millwrights
- 043+ Fitters n.e.c., machine erectors, etc.
- 044 Electro-platers, dip platers and related workers
- 045+ Plumbers, gas fitters, lead burners
- 046* Pipe fitters, heating engineers
- 047 Press workers and stampers
- 048 Metal workers n.e.c.
- 049 Watch and chronometer makers and repairers
- 050 Precision instrument makers and repairers
- 051 Goldsmiths, silversmiths, jewellery makers
- 052 Coach, carriage, wagon builders and repairers
- 053 Inspectors (metal and electrical goods)
- 054 Other metal making, working; jewellery and electrical production process workers

VIII. WOODWORKERS

- 055 Carpenters and joiners
- 056 Cabinet makers
- 057 Sawyers and wood working machinists
- 058 Pattern makers
- 059+ Woodworkers n.e.c.

NOTE 2 (CONTINUED):

IX. LEATHER WORKERS

- 060 Tanners; leather, fur dressers, fellmongers
- 061 Shoemakers and shoe repairers
- 062 Cutters, lasters, sewers, footwear and related workers
- 063 Leather products makers n.e.c.

X. TEXTILE WORKERS

- 064 Fibre preparers
- 065+ Spinners, doublers, twistors
- 066* Winders, reelers
- 067 Warpers, sizers, drawers-in
- 068 Weavers
- 069 Knitters
- 070 Bleachers and finishers of textiles
- 071 Dyers of textiles
- 072 Textile fabrics and related products makers and examiners n.e.c.
- 072.4* Rope, twine and net makers
- 073 Textile fabrics, etc. production process workers n.e.c.

XI. CLOTHING WORKERS

- 074 Tailors, dress, light clothing makers
- 075 Upholsterers and related workers
- 076 Hand and machine sewers and embroiderers, textile and light leather products.
- 077 Clothing and related products makers n.e.c.

XII. FOOD, DRINK AND TOBACCO WORKERS

- 078 Bakers and pastry cooks
- 079 Butchers and meat cutters
- 080 Brewers, wine makers and related workers
- 081 Food processors n.e.c.
- 082 Tobacco preparers and products makers

NOTE 2 (CONTINUED):

XIII. PAPER AND PRINTING WORKERS

- 083 Makers of paper and paperboard
- 084 Paper products makers
- 085 Compositors
- 086 Printing press operators
- 087 Printers (so described)
- 088 Printing workers n.e.c.

XIV. MAKERS OF OTHER PRODUCTS

- 089 Workers in rubber
- 090 Workers in plastics
- 091 Craftsmen n.e.c.
- 092 Other production process workers

XV. CONSTRUCTION WORKERS

- 093 Bricklayers, tile setters
- 094 Masons, stone cutters, slate workers
- 095 Plasterers, cement finishers, terrazzo workers
- 096 Builders (so described); clerks of works
- 097* Bricklayers', etc., labourers n.e.c.
- 098+ Construction workers n.e.c.

XVI. PAINTERS AND DECORATORS

- 099 Aerographers, paint sprayers
- 100 Painters, decorators n.e.c.
- 101* Coach painters (so described)

XVII. DRIVERS OF STATIONARY ENGINES, CRANES, ETC.

- 102 Boiler firemen
- 103 Crane and hoist operators; slingers
- 104 Operators of earth moving and other construction machinery n.e.c.
- 105 Stationary engine, materials handling plant operators n.e.c.; oilers and greasers

NOTE 2 (CONTINUED):

XVIII. LABOURERS N.E.C.

- 106 Railway lengthmen
+Labourers and unskilled workers n.e.c.
- 107 Chemical and allied trades
- 108 Engineering and allied trades
- 109 Foundries in engineering and allied trades
- 110 Textiles (not textile goods)
- 111 Coke ovens and gas works
- 112 Glass and ceramics
- 113 Building and contracting
- 114 Other

XIX. TRANSPORT AND COMMUNICATIONS WORKERS

- 115 Deck, engineering officers and pilots, ship
- 116 Deck and engine room ratings, barge and boatmen
- 117 Aircraft pilots, navigators and flight engineers
- 118 Drivers, motormen, second men, railway engine
- 119 Railway guards
- 120 Drivers of buses, coaches
- 121 Drivers of other road passenger vehicles
- 123 Inspectors, supervisors, transport
- 124 Shunters, pointsmen
- 125: Signalmen and crossing keepers, railways
- 126= Traffic controllers and dispatchers, transport
- 127 Telephone operators
- 128 Telegraph and radio operators
- 129 Postmen, mail sorters
- 130 Messengers
- 131 Bus conductors
- 132 Porters, ticket collectors, railway
- 133 Stevedores, dock labourers
- 134 Lorry drivers' mates, van guards
- 135 Workers in transport and communication occupations n.e.c.

XX. WAREHOUSEMEN, STOREKEEPERS, PACKERS, BOTTLERS

- 136 Warehousemen, storekeepers and assistants
- 137 Packers, labellers and related workers

NOTE 2 (CONTINUED):

XXI. CLERICAL WORKERS

- 138: Office managers n.e.c.
- 139+= Clerks, cashiers
- 140*= Office machine operators
- 141= Typists, shorthand writers, secretaries
- 142 Civil service executive officers

XXII. SALES WORKERS

- 143= Proprietors and managers, sales
- 144= Shop salesmen and assistants
- 145 Boundsmen (bread, milk, laundry, soft drinks)
- 146 Street vendors, hawkers
- 147 Garage proprietors
- 148 Commercial travellers, manufacturers' agents
- 149 Finance, insurance brokers, financial agents
- 150 Salesmen, services, valuers, auctioneers

XXIII. SERVICE, SPORT AND RECREATION WORKERS

- 151 Fire brigade officers and men
- 152 Police officers and men
- 153 Guards and related workers n.e.c.
- 154 Publicans, innkeepers
- 155 Barmen, barmaids
- 156: Proprietors and managers boarding houses and hotels
- 157= Housekeepers, stewards, matrons and housemothers
- 158: Domestic housekeepers
- 159: Restaurateurs
- 160: Waiters and waitresses
- 161= Canteen assistants, counter hands
- 162 Cooks
- 163 Kitchen hands
- 164 Maids, valets and related service workers n.e.c.
- 165 Caretakers, office keepers
- 166= Charwomen, office cleaners; window cleaners, chimney sweeps
- 167 Hairdressers, manicurists, beauticians
- 168 Launderers, dry cleaners and pressers
- 169 Athletes, sportsmen and related workers
- 170 Hospital or ward orderlies; ambulance men
- 171: Proprietors and managers, service, sport and recreations n.e.c.
- 172= Service, sport and recreation workers n.e.c.

NOTE 2 (CONTINUED):

XXIV. ADMINISTRATORS AND MANAGERS

- 173 Ministers of the Crown; M.Ps. (n.e.c.); senior government officials
- 174 Local authority senior officers
- 175 Managers in engineering and allied trades
- 176 Managers in building and contracting
- 177 Managers in mining and production n.e.c.
- 178 Personnel managers
- 179 Sales managers
- 180= Managers n.e.c.

XXV. PROFESSIONAL, TECHNICAL WORKERS, ARTISTS

- 181 Medical practitioners (qualified)
- 182 Dental practitioners
- 183 Nurses
- 184= Pharmacists
- 185 Radiographers (medical and industrial)
- 186: Ophthalmic and dispensing opticians
- 187: Chiropodists
- 188: Physiotherapists
- 189: Occupational therapists
- 190: Public health inspectors
- 191= Medical workers n.e.c.
- 192 University teachers
- 193: Primary and secondary school teachers
- 194= Teachers n.e.c.
- 195 Civil, structural, municipal engineers
- 196 Mechanical engineers
- 197+ Electrical engineers
- 198* Electronic engineers
- 199: Work study, progress engineers
- 200: Planning, production engineers
- 201: Engineers n.e.c.
- 202: Metallurgists
- 203= Technologists n.e.c.
- 204* Chemists
- 205+ Physical and biological scientists
- 206 Authors, journalists and related workers
- 207 Stage managers, actors, entertainers, musicians
- 208 Painters, sculptors and related creative artists
